

CONQUER PARALYSIS NOWSM

A GLOBAL PROJECT OF THE SAM SCHMIDT FOUNDATION

EMPOWER! Fueling Independence, Defeating Paralysis

At Conquer Paralysis Now, we are dedicated to one audacious goal: to conquer paralysis and give those affected by spinal cord injuries and other neurological disorders a chance to reclaim their lives. Our journey so far has been marked by breakthroughs, relentless research, and unwavering support from people like you who believe in a world without limitations.

We are excited to announce our new campaign, "*Empower: Fueling Independence, Defeating Paralysis*", aimed at raising \$25 million to purchase and renovate a state-of-the-art facility in Carmel, Indiana. This transformative investment will become the cornerstone of our efforts to revolutionize the treatment of paralysis and other neurological disorders and advance groundbreaking research that will ultimately cure paralysis in our lifetime.

Our Capital Campaign represents a pivotal moment in our mission. We are embarking on a groundbreaking initiative to accelerate research, innovation, and accessibility for individuals living with paralysis and other neurological disorders all over the world. This is more than just a campaign; it is a rallying cry to change the future.

By supporting the Empower Campaign, you are not only investing in the bricks and mortar of a state-of-the-art facility but also in the hope, determination, and resilience embodied by Sam Schmidt and the more than five million individuals living with paralysis and other neurological disorders. Your contribution will send a powerful message that we, as a society, are committed to finding a cure for paralysis and restoring independence to those affected by it. Your generosity will enable us to:

- Offer life-changing therapy services to countless individuals living with paralysis and other neurological conditions, empowering them to regain their independence and improve their quality of life.
- Advance groundbreaking research that will pave the way for new treatments, technologies, and ultimately, a cure for paralysis.
- Create a collaborative hub for the world's leading experts in research and treatment, fostering innovation and accelerating progress toward our shared goal.

Want More Information

Help us rewrite the story of so many and inspire the world to secure a brighter future for generations to come. With your support, we can turn our vision into reality and change the course of treatment and research forever.
